EXPORT AND IMPORT MERCHANDISE TRADE

The Bureau of the Census, Department of Commerce, announced today that during July, U.S. exports excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments and on a seasonally adjusted basis, were valued at $2,803.0 million and that general imports for July, also on a seasonally adjusted basis, were valued at $2,664.4 million.[1] [2] Comparable figures for June were $2,759.3 million for exports and $2,839.3 million[3] for imports. The July export total, seasonally adjusted, is the second highest such total on record and is exceeded only by the total of $2,888.5 million reported for April of this year. Although the seasonally adjusted general import total for July is substantially less ($174.9 million) than the June total, it is at approximately the same level as the monthly average for the first 7 months of this year.

For the first 7 months of 1968 exports on a seasonally adjusted basis were at an annual rate of $32,885 million while imports were at an annual rate of $32,090 million. This represents an increase in exports of about 6 percent over the calendar year 1967 total of $30,934 million and an increase in imports of about 20 percent over the calendar year 1967 total of $26,812 million.

For the 4-month period April-July 1968, seasonally adjusted exports averaged $2,792.6 million per month, a level about 5 percent above the $2,654.0 million average reported for the preceding 4-month period, December 1967 - March 1968. Imports averaged $2,724.0 million per month for the current 4-month period, a level about 5 percent above the $2,587.1 million average reported for the preceding 4-month period.

Seasonally adjusted export and import totals for selected Schedule A and B commodity sections and divisions are shown in tables 4 and 5. (Unlike the overall total, the commodity components for exports exclude foreign merchandise and include Department of Defense Military Assistance Program Grant-Aid shipments.)

July exports unadjusted and excluding Military Assistance Program Grant-Aid shipments, were valued at $2,640.5 million ($2,681.5 million in June). With Military Assistance Program Grant-Aid shipments included, July exports were valued at $2,699.5 million slightly below the comparable June total of $2,731.2 million. Unadjusted general imports during July amounted to $2,812.0 million, about 6 percent above the June total of $2,648.8 million.[3]

[1] *Adjusted for seasonal and working-day variation, but not for price level.*

[2] *Cumulations of data over at least 3- or 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following table with average percent month-to-month rise and decline over longer periods shown for comparison. (Excludes percentage changes for the period December 1962-March 1963 and December 1964-May 1965 because of abnormalities in the data due to effects of strikes.)*

EXPLANATION OF STATISTICS

The dollar value shown in the import statistics is defined generally as the market value in the foreign country excluding U.S. import duties, freight charges from the foreign country to the United States, and insurance. General imports are commodities imported for immediate consumption plus entries into bonded warehouses. Imports for consumption are commodities imported for immediate consumption plus withdrawals for consumption from bonded warehouses. The dollar value shown in the export statistics is defined generally as the f.a.s. value, U.S. port of exportation. None of the values have been adjusted for changes in price level. Additional information regarding coverage, valuation, etc., is available in Report FT 990, Highlights of U.S. Export and Import Trade; in the brochure, Guide to Foreign Trade Statistics: 1968; or upon request to the Bureau of the Census, Washington, D.C. 20233. Information regarding the methodology used in seasonally adjusting the data is available on request to the Bureau of the Census, Washington, D.C. 20233.

[2]Data differs from those released in Department of Defense reports because of a difference in statistical definitions. For a further explanation, see footnote 1, table E-1, Report FT 990, Highlights of U.S. Export and Import Trade.
